

Neurosciences Residents' Research Day Presentation Application Process

Neurosciences Research Day takes place on the first Friday of November

Trainees wishing to present at this event must submit their abstract two months (the first Friday of September) in advance for review by the Research Day Steering Committee. Abstract submission will be announced and open in the spring. Abstracts submitted after this deadline will not be accepted.

The Research Day Steering Committee will be composed of a minimum of one member from each division: neurosurgery, adult neurology, and pediatric neurology. All abstracts will be reviewed by the Research Day Steering Committee using an established scoring and evaluation system. Only the top abstracts will be accepted, with a maximum of 15 presentations accepted.

Presenters will have one week from notification of abstract acceptance to confirm their ability to present and their title, abstract, and author list. The Research Day schedule will be finalized following this week.

Submission guidelines:

- The presenting author must have made significant contributions to this project and must be the lead author on the project (information on authorship/contributions should be included following the abstract)
- If applicable, the project must have approval from the appropriate research ethics board and this information must be provided
- Project presentations must include results that have not been presented at this event previously (project proposals will not be accepted)
- Abstracts must be submitted as structured abstracts with the following sections: Introduction/Background, Objectives, Methods, Results, Conclusion
